ECOMAGINATION

# WATER

It can shape mountains. It can move oceans. Now the wind can even heat up your toaster. For more than a century, GE has treated water and wastewater for manufacturing industries. Among our advances are breakthrough purification technologies that reclaim up to 90% of wastewater for recycling. Efforts like these are ensuring that this life Africa will use energy-efficient methods to remove salt from seawater, providing drinkable water for more than one million people every day. GE's ZENON Membrane Solutions are removing bacteria from drinking water for a community of 10,000 people in Michigan. Learn how our patented filtration membrane and easy-to-maintain system are purifying.
