What did the instructor do that made his/her teaching effective?

The reading assignments were effective.

She made interesting and easy to remember analogies

Dr. Sutherland was very passionate about Biochemistry, and it was such a blessing that she understood how to work the rejector and utilize her writing tablet.

What could the instructor do to improve his/her teaching effectiveness?									
Less time spent answering questions and more time spent lecturing/ teaching material.									
Change the way she does the lecture notes/power points.									
She had obvious favorite students which made me feel like I wasn't one of them and couldn't go talk to her									
I wish that blackboard would show our current grade instead of us having to calculate it.									
Write any additional comments that you would like to make.
