To: Autumn Sutherlin <als03c@acu.edu>

Dr. Sutherlin,

The purpose of me writing to you is to thank you and affirm your teaching of the Biochemistry class. I am currently at Texas A&M vet school and the biochem that I learned in your class and your wicked hard tests :) have really helped me alot even in only the second week of class. Those enzyme equations especially, V_{max} , K_m , etc. Just thought that I should let you know that I feel that my background in Biochem attained from ACU and your teaching is truley superior to the background of knowledge that my classmates have in the subject.

Well that's about it but just thought that you would appreciate the fact that although I'm biased of course, I feel that ACU really did a great job of preparing students for professional school.

Hope that you are well and keep on those pre-professional majors cause the hard work in undergrad definately pays off.

Your former student,
Kaitie Kirkpatrick
