

Autumn,

I just wanted to say 'Thank you' for writing me so many recommendation letters. I really appreciate it. Also, I wanted to thank you for listening to all my ramblings about these grad school decisions and interviews and whatnot. Your advice has been much appreciated. I still remember when I was a sophomore and you told me I could switch to Biochem standard and stop taking biology classes if I hated them so much. That piece of advice is what caused me to really realize that I didn't want to be pre-med anymore. Thank you for that. Lastly, thank you for not killing me in Montevideo. I'm very excited to be going to UT Austin in the fall and I appreciate all your help.

Thank you so much again,

Rachel
