

Young Alice, an adventurous girl whose stuffy British upbringing stands in the way of her vivid imagination, takes a journey down a rabbit hole that brings her to Wonderland. While trying to find her way through this whimsical, topsy-turvy world, she encounters angry queens, mad tea parties, mischievous cats and foods that provide more than a pleasant taste.

As she grows curiouser and curiouser, she finds herself in more and more trouble while she tries, with the help of a few harebrained friends, to find her way back home.

Lewis Carroll (1832-1898) is best known for *Alice in Wonderland* and *Through the Looking Glass*. He is widely considered one of the cleverest, most whimsical writers of English literature for his unique style and skill with word play. Aside from a beloved children's author, he was also a famed mathematician, logician, Anglican deacon and photographer.
