

Recommendation Letter

To Whom it May Concern,

Dr. Homer is an excellent professor, person, and teacher who connects well with students inside and outside of class. His style of teaching instigates students to be accountable for their learning and assignments and also lets the student know that he is available to answer questions and brainstorm assignments at any time. He keeps the students engaged in the classroom with class discussions and interactive activities.

Many of his students have gone on to bigger and better things, including myself. Having worked for the Department of Defense for nearly three years now, I can say confidently that Dr. Homer's teaching has prepared me for difficult and important work in the field of computer science. I have recommended students in the past to enroll in his classes, and I continue to do so today. ACU's computer science department needs intelligent, tough, and student-focused professors to continue to progress and improve the department. Dr. Homer fits this description perfectly.

Having taken multiple classes with Dr. Homer and spent some time outside of the classroom with him, I have seen his excellent character. He is fun to be around whether it is inside the department or on the volleyball court. He is an excellent role model for the students and respected among his peers and students.

I highly recommend Dr. John Homer for a tenured position at ACU. His long term presence will no doubt continue to improve the computer science department at ACU.

Sincerely,

Nathanael McConnell
Cryptanalytic Computer Scientist
