John,  
Thank you for your prompt reply. I noticed that your name is not listed on the pdf file as the author of the paper.  
Please include your name and affiliation and send it to me again so that you will be recognized for your nice work!

By the way, I have asked the TX MAA chair to consider re-instating the journal, given the upward direction that it has been taking and the hasty manner in which the decision was made, without the input of the editors. We keep this journal of high quality and reject as many or more papers than we accept. So, congratulations for having your paper accepted to this journal. This is an accomplishment to be proud of, and we are honored that you chose the TX CMJ for your paper.

Sincerely,  
Barbara
