What did the teacher do that was effective? Be specific and name the actions that helped you as a learner (for example, particular assignments, discussions, presentations, etc.)

He allowed us to participate in the lectures

The in class participation helped us interact with the subject matter

Answered questions and was engaging with students

Dr. Cha helped keep the mood light, yet professional with added humor and well developed discussion.

I think that the daily quizzes and the daily one point essays really helped me remember what it is we were talking about that day. The consistent grades also made it easier to rebound bad grades which was good.

He was very social with the class, and made it so everyone was involved through out the class

by giving us those quiz it help balance out are grades.

The discussions helped understand the info better

Allowed the class to work in groups

Was willing to help with missed notes when absent

He helped me with struggles I had in the class he showed up on time ready to start the class with an interesting lesson. He was also available for meeting hours specified on the syllabus.

The professor really listened to the students and took in the feedback very well. When the students suggested a way to learn the material better or a more effective way to understand the material the professor listened and made the students feel free to speak their minds.

He used power points to better explain the lessons.

I really liked how he had us working in groups for most of each class period.

His PowerPoint were effective and helped with studying and learning the class material along with class lecture. Also his one point essays at the end of classes helped

He taught extremely well and I enjoyed being in his class.

I think that Cha's methods of in-class discussion and encouraging discussion among students was really effective. Sometimes it is difficult for me to digest an entire lecture, but if I can discuss the subjects and exchange my own thoughts I can better understand a subject.

Professor Cha knew the material, was accessible to student's, and knew how to get all involved. Great class.

Class discussions, one point essays and quizzes were all helpful learning tools!

He is an excellent professor and I learned a lot in this class. I really liked the class format and actually liked the idea of having daily quizzes or one point essays, even though at first I dreaded them. The one point essays were good because it forced me to challenge myself and not just take a quiz. It actually required me to think so that is a really good thing. Overall the class was really good. Class time flew by which is good because it meant the class was interesting and easy to engage in. I enjoyed going to class and like I said earlier I learned a lot.

The Quizzes helped me out a lot by boosting my grade in the class and helping understand the material that I just learned

He was always very interactive in class; asking questions, making jokes to keep us engaged as well as in good spirit.

He was helpful that he gave us quizzes.

He made each lesson personal.

I think the group quizzes were very effective and helped me learn more. I also liked that many of them were not in multiple choice format but essay format.

gave daily points to help grade
He made the class interesting by making jokes and that helped us retain a lot of the information.
He wanted to get as many students involved as possible by asking lots of questions and calling on random people.
discussion.
nothing really comes to mind. i do not think he is prepared enough to teach this course.
He was very good in explaining every scripture and also preparing us for each and every exam
Descriptive study guides
What specific recommendations do you have for the improvement of this course? Name some particular actions that the professor could take to improve learning in the class.
It was great! Better study guides!
Some of the things on the test were not clearly explained in the lecture, nor were they included in the reading.
More group work
This class is fine the way it is, although sometimes i did feel bored.
I would have liked to have seen him talk a little bit more indepth about the books themselves. We read a LOT out of Powell but for 95% of the entire course, I didn't even need to bring a Bible and that's sad really. I never actually read the bible, only about the bible.
I would really like it, if this course talked and spoked more about the book of revaltion
study guieds
More discussion of the readings
More helpful review sessions
Whats on the review should be on the test, sometimes it was not always on there
I sometimes struggled with understanding what he wanted us to do on daily quizzes.
When we listened to videos in class it was very difficult to follow along in our fill in note sheets, And was very difficult to hear the words that were being spoken. When the students told the professor about the difficulties he listened and made sure we were able to hear next time we watched videos.
None
I would not have the specific videos. I would include more interesting videos so it would be easier to retain as a student.
I think he did a good job with everything
He was little difficult to understand but his teachings were very clear in what he wanted us to do and he was always well prepared.
I think that Professor Cha has a lot of knowledge and is a great teacher, but I think that the subject and the material is broad and open-ended I think it would help if the professor had a little more specificity with his lessons as far as helping the understand what he would like them to get out of his class and his lessons.
Nothing, great class
Cha didn't always make it through the whole PowerPoint presentation making it hard to study for tests.
I think it would be really helpful if we did more one point essays than quizzes. I in a way prefered the quizzes but I got the most out of the one point essays because I had to think through the questions and come up with my own answers.

I can't think of any...
I think he was great job so I dong have recommendation.
Maybe slower pace.

I feel as though a big chunk of class was spent getting 'settled down'. I would have loved to have more lecture time, but too much time was spent at the beginning of class making announcements, conversating, etc.
The reading became a challenge for me at times. I believed that the reading assignments were to ecssesive.
nothing
Ask students questions about the lecture more
I do not have anything in particular.
Not having quizzes everyday.
He might need to work on relating to the students. he did not grade as he said he would. he did not always follow the syllabus. was not reliable. did not feel i could come to him. did not really listen when i did.
Make the course less lecturing, and more student participation
Better ways of teaching
