A = Approve I = Information Item R = Respond in Writing

Course Number _____ or Degree Plan(s) Interior Design

State the requested change and reason. A memo may be attached if more space is necessary.

In addition to the GenEd-related changes, the department would like to change the name of the Interior Design degree.

Current Degree: Bachelor of Science in Interior Design

Proposed Degree name change: Bachelor of Science in Interior Architecture and Design

Rationale:

The Art+Design Department would like to submit for approval a change of degree title from Interior Design to Interior Architecture and Design. This name more accurately represents the coursework we offer, reflects the intricate relationship between the design of interiors and architecture, and is in keeping with shifts in industry language.

Indicate the requested change.

¹ When an academic unit does not have a council, the UGEC and/or AUAC will serve as its academic council, depending on the nature of the issue.

² Courses that satisfy ACU's University Requirements will normally have lower-level numbering, be free of prerequisites and co-requisites, appeal to more than one or two majors, and "not narrowly focus on those skills, techniques, and procedures specific to a particular occupation or profession" (SACS 2.7.3). Departments may request exceptions to the first three criteria.

³ For undergraduate majors, a minimum of 30 hours is required. These programs must have a minimum of 6 elective hours, unless the requirements of external accrediting bodies make it impossible.

Interior Design, Art and Design, BS (INTD-IART)

BS: Interior Design Degree Plan (INTD)

The Bachelor of Science degree in Interior Design is nationally accredited by the Council for Interior Design Accreditation (CIDA). The curriculum prepares students for careers in business, industry and retail, and for research and graduate study. The curriculum is designed for those interested in how technical and aesthetic aspects of interior design affect a diversity of populations in residential and non-residential environments. The curriculum prepares students with unique problem solving techniques to creatively plan and design environments that protect the health, safety and welfare of building occupants.
