30.	Comprehensive revision of General Education Requirements	-	-	-	-	A	A	A	A	I

Notes

² Any change to a cross-listed course requires the signature of both department chairs or program directors overseeing the course to ensure that the courses stay in sync. This includes courses taught at other campuses (e.g. BIBL 101 and BIBO 101).

³ For undergraduate majors, a minimum of 30 hours is required. These programs must have a minimum of 6 elective hours, unless the requirements of external accrediting bodies make it impossible. Master's programs must include a minimum of 30 hours, and doctoral programs must include a minimum of 30 hours beyond the master's.

⁴ When a department/school or dean proposes closing a program, approval routing follows the typical process beginning with the department/school. An administrative proposal by the provost or senior vice president for academic affairs would follow the "provost-proposed" routing on the chart.

BIOL 123

BIOL 121-124 Course Content Changes Justification

This proposal seeks to make minor changes to the course content of BIOL 121 (Introductory Biology I), 122 (Introductory Biology I lab), 123 (Introductory Biology II) and 124 (Introductory Biology II lab). Currently, BIOL 121 and 122 cover ecological concepts, but these topics do not fit well within these courses in terms of the way biological concepts are typically presented in introductory-level courses. Ecology concepts should be presented after the completion of the diversity of life content, which falls at the end of BIOL 123/124. This change would be in line with the order in which the information is presented in virtually all introductory biology textbooks. Additionally, ecology concepts are most often paired with diversity content at other institutions, so this would make course equivalencies more straightforward. We propose to remove ecology content from BIOL 121 and 122, and move it to BIOL 123 and 124. No other changes will be made to course content.

The revised course descriptions and outcomes for each course are listed below. *Please note: in all of the revisions below, we are removing the competency measures and only including outcomes.*

Catalog description:

BIOL 123 - Introductory Biology II

Lecture Hours: 3

Lab Hours: 0

Credit Hours: 3

Terms Offered: Fall, Spring

BIOL 123 - current description

A consideration of the diversity of life, emphasizing organism classification, structure and function in plants and animals. Prerequisite: A grade of "C" or better in BIOL 121 and BIOL 122. Corequisite: BIOL 124. A grade of "C" or better must be achieved to enroll in subsequent Biology courses.

BIOL 123 - revised description

A consideration of the diversity of life, emphasizing phylogenetic concepts and systematics of living organisms, structure and function in plants and animals, and ecology. Prerequisite: A grade of "C" or better in BIOL 121 and BIOL 122. Corequisite: BIOL 124. A grade of "C" or better must be achieved to enroll in subsequent Biology courses.

BIOL 123 - current outcomes

- *Students will demonstrate knowledge and understanding of the diversity of life, structure and function of plants and animals, and phylogenetic concepts and applications.*

Competency in this biological knowledge will be assessed by weekly in-class quizzes, three lecture exams throughout the semester, and a cumulative final exam.

BIOL 123 - revised outcomes

At the end of this course, a student will be able to:

1. Explain phylogenetic concepts and interpret a phylogenetic tree.
2. Demonstrate an understanding of the diversity of life.
3. Describe the structure and function of plants and animals.
4. Discuss the interdependence of living organisms within ecosystems and the environment, including the ethical implications of human impact.
