

Abilene Approval Chart for Curriculum Changes

A = Approve I = Information Item R = Respond In Writing

Course Number: ENGR/PHYS 135

or Degree Plan(s):

ENGR/PHYS 135 - Introduction to Electric Circuits Description and Prerequisites

New description:

Principles of linear electric circuit analysis. Kirchhoff's laws, nodal and loop analysis, superposition and source substitution, steady state sinusoidal analysis, steady state power analysis, passive filters, operational amplifiers, and active filters.

Rationale: This description better fits the course content than the previous description.

Was: Credit for or simultaneous enrollment in MATH 185, Coreq - ENGR/PHYS 136

New: Credit for or concurrent enrollment in MATH 185

Rationale: The lab will no longer be required for the Mechanical Engineering degree. We therefore want to decouple the two courses.

Notes

² Any change to a cross-listed course requires the signature of both department chairs or program directors overseeing the course to ensure that the courses stay in sync. This includes courses taught at other campuses (e.g. BIBL 101 and BIBO 101).

³ For undergraduate majors, a minimum of 30 hours is required. These programs must have a minimum of 6 elective hours, unless the requirements of external accrediting bodies make it impossible. Master's programs must include a minimum of 30 hours, and doctoral programs must include a minimum of 30 hours beyond the master's.

⁴ When a department/school or dean proposes closing a program, approval routing follows the typical process beginning with the department/school. An administrative proposal by the provost or senior vice president for academic affairs would follow the "provost-proposed" routing on the chart.
