

Abilene Approval Chart for Curriculum Changes

A = Approve I = Information Item R = Respond In Writing

Course Number: _____ **or Degree Plan(s):** **Animal Science Livestock Production**

Short description: We are requesting 2 changes. The first is a change to this plan contingent upon approval of the new course AENV 353: Plant and Animal genetics. This change will replace the required classes BIOL 351: Genetics, and BIOL 352: Genetics Lab with AENV 353. The second change is to drop the CHEM 112: Introductory Organic and Biological Chemistry Lab requirement. This course is only taught irregularly. A review of similar programs at other Texas schools revealed that no other programs require an organic chemistry lab. These two changes will reduce the required course load by two hours.

Notes

² Any change to a cross-listed course requires the signature of both department chairs or program directors overseeing the course to ensure that the courses stay in sync. This includes courses taught at other campuses (e.g., BIBL 101 and BIBO 101).

³ For undergraduate majors, a minimum of 30 hours is required. These programs must have a minimum of 6 elective hours, unless the requirements of external accrediting bodies make it impossible. Master's programs

must include a minimum of 30 hours, and doctoral programs must include a minimum of 30 hours beyond the master's.

⁴ When a department/school or dean proposes closing a program, approval routing follows the typical process beginning with the department/school. An administrative proposal by the provost or senior vice president for academic affairs would follow the "provost-proposed" routing on the chart.

Animal Science, Livestock Production, BS (ANSC-LP)

BS: Animal Science Degree Plan (ANSC)

The animal science degree is designed to prepare students to effectively serve the livestock industry by producing graduates conversant in issues related to animal agriculture. The curriculum is designed for academically talented students interested in the application of biology and technology to the care, management and study of domestic animals. While the program emphasizes traditional farm species of dairy cattle, beef cattle and swine, it also addresses companion animals, small ruminants, and poultry. The animal science curriculum contains a fundamental animal science core accompanied by emphasis tracks. The tracks are pre-veterinary medicine and health, business and industry, livestock management, and biotechnology and research. Graduates are prepared for admission to professional and/or graduate programs for advanced studies or entry into career fields.

Major Requirements

Agricultural and Environmental Sciences Core

AENV 101 - Foundations of Agricultural and Environmental Sciences Credit Hours: 1

AENV 201 - Current Issues in Agricultural and Environmental Sciences Credit Hours: 1

AGRB 261 - Principles of Agricultural and Applied Economics Credit Hours: 3 *

ANSC 111 - General Animal Science Credit Hours: 3

ENVR 112 - Plant Science Credit Hours: 3

ENVR 233 - Soil Science Credit Hours: 3

*Hours may also fulfill general education requirements and are not included in total major hours

Total: 11 Credit Hours

Experiential Learning

Students are required to complete an experiential learning component.

Choose 3 hours from the following:

AENV 381 - International Applications in Agricultural & Environmental Sciences Credit Hours: 3

AENV 384 - Internship in Agricultural and Environmental Sciences Credit Hours: 3

AENV 399 - Research in Agricultural & Environmental Sciences Credit Hours: 3 **

**AENV 399 is offered for variable credit, 1-3 credit hours. A total of 3 credit hours must be taken to meet the experiential learning requirement. The course may be repeated for up to 3 credit hours.

Total: 3 Credit Hours
