Course Number: _____ **or Degree Plan(s):** **BMSC-PMED**

Short description: On the BMSC-PMED track, BIOL 495: Physiology Laboratory was left off the Advanced Biomedical Sciences Elective Menu. For all other degrees/tracks, BIOL 495 is listed as part of the major concentration requirements or in the advanced biomedical sciences elective menu. The OCSE Biomedical Sciences Committee is recommending adding BIOL 495: Physiology Laboratory to the Advanced Biomedical Sciences Electives Menu for BMSC-PMED.

OSCE Biomedical Sciences committee is recommending removing the BIOL 492 Physiology requirement and replacing it with the Department of Biology's new course BIOL 494 Human Physiology. The course content in Human Physiology is a better choice for a Biomedical Sciences degree programs and tracks that prepare students for careers in human health.

Notes

² Any change to a cross-listed course requires the signature of both department chairs or program directors overseeing the course to ensure that the courses stay in sync. This includes courses taught at other campuses (e.g., BIBL 101 and BIBO 101).

³ For undergraduate majors, a minimum of 30 hours is required. These programs must have a minimum of 6 elective hours, unless the requirements of external accrediting bodies make it impossible. Master's programs must include a minimum of 30 hours, and doctoral programs must include a minimum of 30 hours beyond the master's.

⁴ When a department/school or dean proposes closing a program, approval routing follows the typical process beginning with the department/school. An administrative proposal by the provost or senior vice president for academic affairs would follow the "provost-proposed" routing on the chart.
