Course Number: _____ **or Degree Plan(s):** CHEM Minor

Since the Chemistry Minor was created, we added new Chemistry courses that have numbers that are left out of the number range for course selection. Currently, the excluded courses are CHEM 456 Biochemistry III and CHEM 483 Polymer Chemistry. We wish to change to a more generic range so that any courses added in the future will not need to be requested. CHEM 393 Introduction to Research is not included because for a minor, students need the material in the coursework. CHEM 401 Secondary Science Teaching Methods is a course for pre-service teachers and is not appropriate for a chemistry minor.

Notes

² Any change to a cross-listed course requires the signature of both department chairs or program directors overseeing the course to ensure that the courses stay in sync. This includes courses taught at other campuses (e.g. BIBL 101 and BIBO 101).

³ For undergraduate majors, a minimum of 30 hours is required. These programs must have a minimum of 6 elective hours, unless the requirements of external accrediting bodies make it impossible. Master's programs must include a minimum of 30 hours, and doctoral programs must include a minimum of 30 hours beyond the master's.

⁴ When a department/school or dean proposes closing a program, approval routing follows the typical process beginning with the department/school. An administrative proposal by the provost or senior vice president for academic affairs would follow the "provost-proposed" routing on the chart.
