Dear Dr. D,

Thanks for being an amazing professor! I really enjoyed being in your class and further expanding my knowledge of physics. I also appreciate you taking your time to help me genuinely understand the material and really helping me achieve that B that I was aiming for in the course. You truly succeeded in "trying your best" at making physics fun and exciting. I hope you have a great winter break and that you get a lot of well-deserved family time!

Sincerely,
Samantha Marchner
